

Blissful™

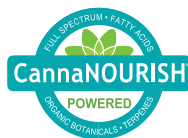

The Blissful Plant Co. LLC

BLISSFUL® PRODUCT BENEFITS

- **Whole Plant Hemp Extract (Full Spectrum)**
Our unique Full Spectrum Hemp extract includes terpenes, cannabinoids, fatty acids, phytonutrients, amino acids, vitamins & minerals, etc., totaling about 560 different compounds. Full Spectrum Hemp extract contains all of the available benefits within the hemp plant - this complex extract benefits from the synergistic properties between the various plant components, creating what is called the Entourage Effect.
- **MCT, Safflower, & Black Cumin Oils**
Your body converts these fatty-acids (Omega-3/6) into endocannabinoids like Anandamide, better know as the "Bliss Molecule." Anandamide is a neurotransmitter that stimulates a sense of happiness and mental well-being.
- **Terpenes**
Secreted in the same glands that produce cannabinoids like THC and CBD, terpenes are aromatic oils that also support the Entourage Effect.
- **English Peppermint Oil (Black Mitcham)**
Peppermint oil has many beneficial uses, like relieving GI discomfort, easing nausea, alleviating pain, and supporting an overall sense of wellbeing.
- **Mucuna Pruriens, Ashwagandha, & Vanilla Extracts**
Ayurvedic herbs are a key component of Blissful Plant® - Ayurvedic herbs are known to boost defense against disease, and keep the mind, body, and spirit in balance.
- **CannaNOURISH®**
A proprietary blend of cannabimimetic botanicals to support the ECS (Endocannabinoid System) with similar pharmacological effects to those of the cannabis sativa plant.
